

Students at Birmingham-Southern College are informed about voter registration as part of the Engage online involvement platform with access to registration through TurboVote. TurboVote allows students to register using either their college or home address and notifies them of local elections accordingly. The TurboVote pop-up message appears the first time a user logs into Engage. The popup continues to appear until the user interacts with it, either to register to vote or dismiss the message.

Paper voter registration forms are available also through the Bunting Center for Engaged Study and Community Action and forms are available to students at various events, such as the student involvement fair.
